

CREATE AN ORIGINAL

BESPOKE LUXURY LIFTS

EEE
GROUP

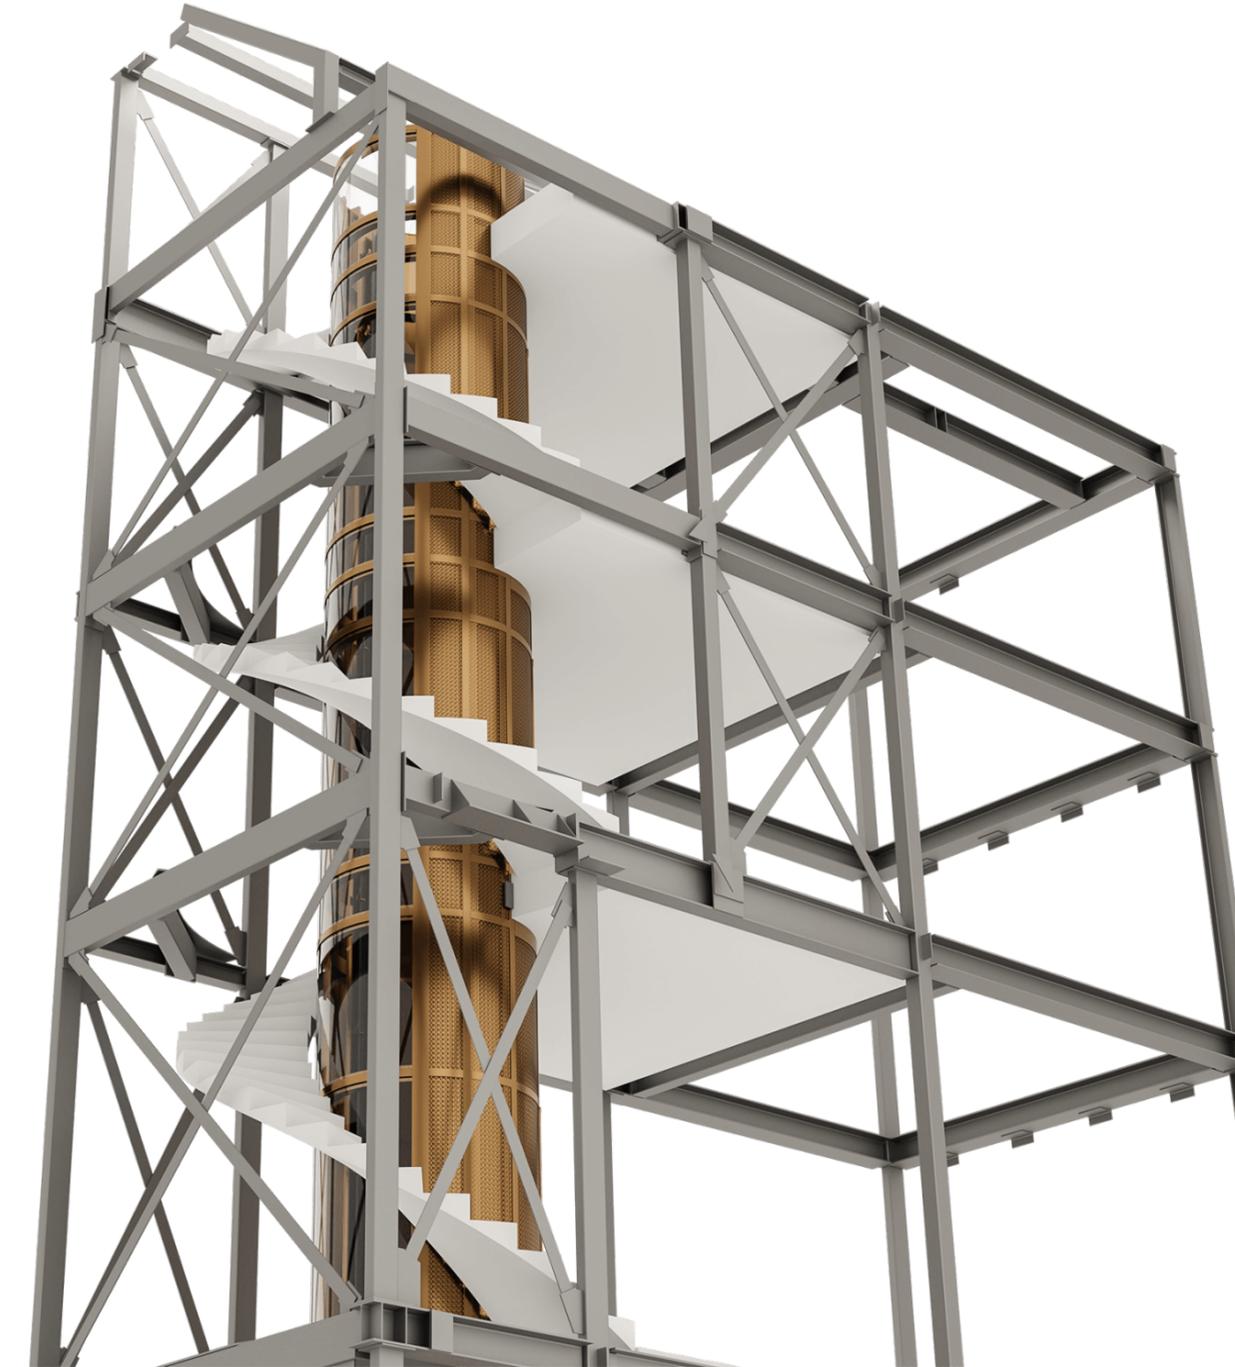

EEE
GROUP

We **design** and install some of the most technically advanced and aesthetically pleasing lifts on the market. Our team of UK lift specialists is highly dedicated to excelling expectations with every brief, with lift solutions that are engineered to improve both accessibility and interior design in any property.

REFINED THROUGH COLLABORATION

We provide clear communication, transparency and an open exchange of ideas during our design process, whilst working with designers, architects, engineers and the end client, to achieve extraordinary lift designs.

EXPERT DESIGN AND CRAFTSMANSHIP

Bringing together the finest materials, our expert designers and craftspeople work with you to create an uncompromising final product.

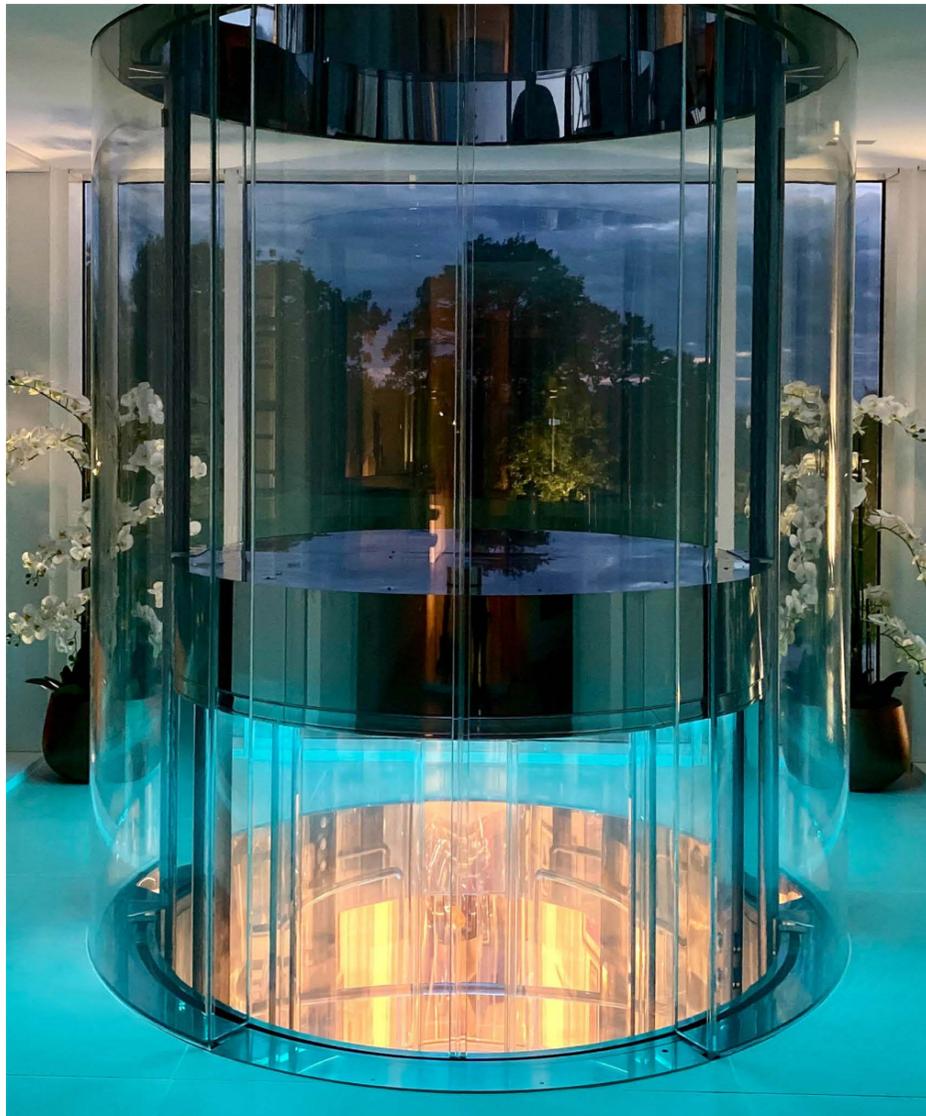

STATEMENT GLASS LIFTS

Achieve panoramic views and dramatic connection to the surrounding architectural space with scenic and glass lift design.

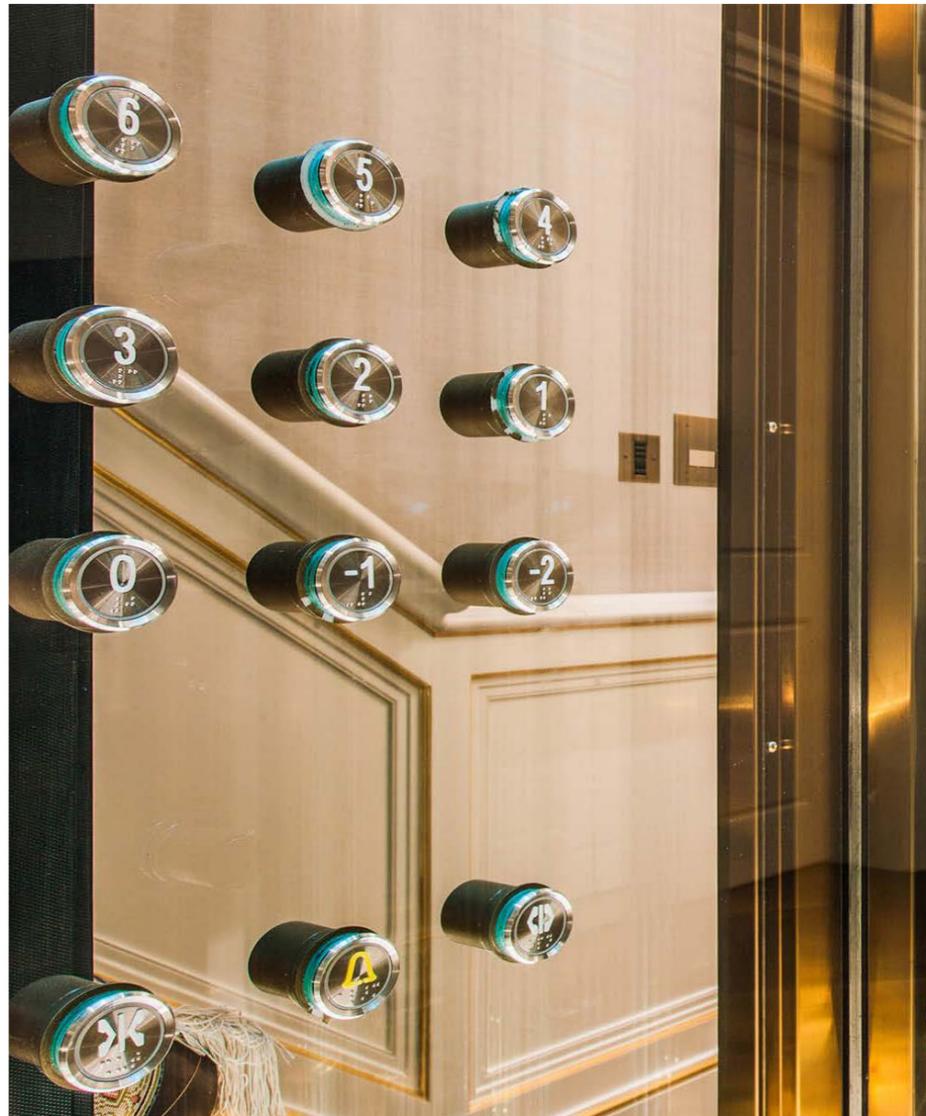

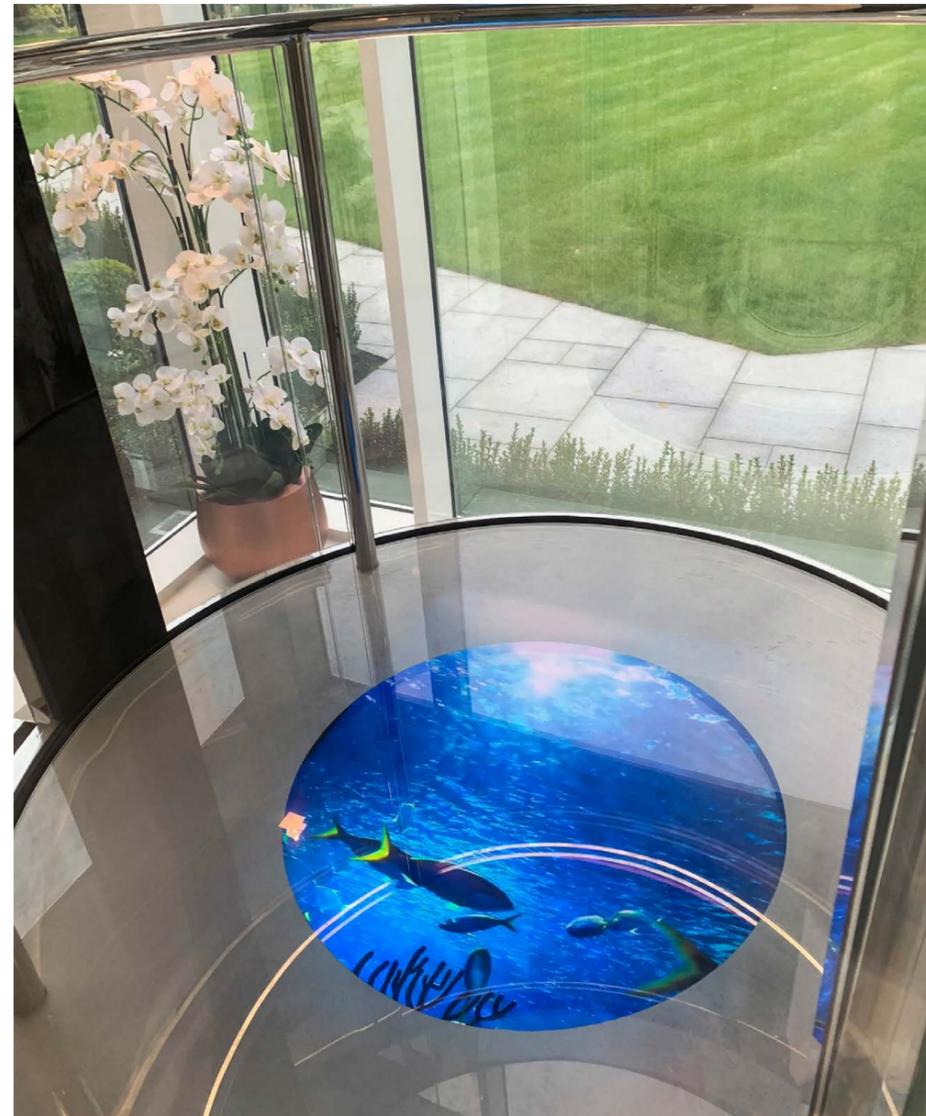

AMBIENT DYNAMIC LIGHTING

We work with expert lighting designers to create stunning ambient light that can connect directly to other smart home systems. With full temperature and Lux control combined with the movement of the lift we can create a cinematic quality to the way the light passes through the space.

WIRELESS PUSH BUTTONS

The wireless push buttons have a small wi-fi board that receives the signal, which is then sent to the main board on the control panel. The battery for each button is lithium and military grade. These need to be replaced approximately every two years (depending on the use of the lift).

LOOPING HDR 4K VIDEO & ANIMATIONS

Combined with our excellent lighting systems we can provide endless looping video playing 4K content and even design unique animations tailored to the user.

EVERY DETAIL CAREFULLY DESIGNED

We obsess over the details to ensure that no element of the design has not been considered. Our designers and engineers work hand-in-hand to create lift creations like no other.

DOLCE & GABBANA

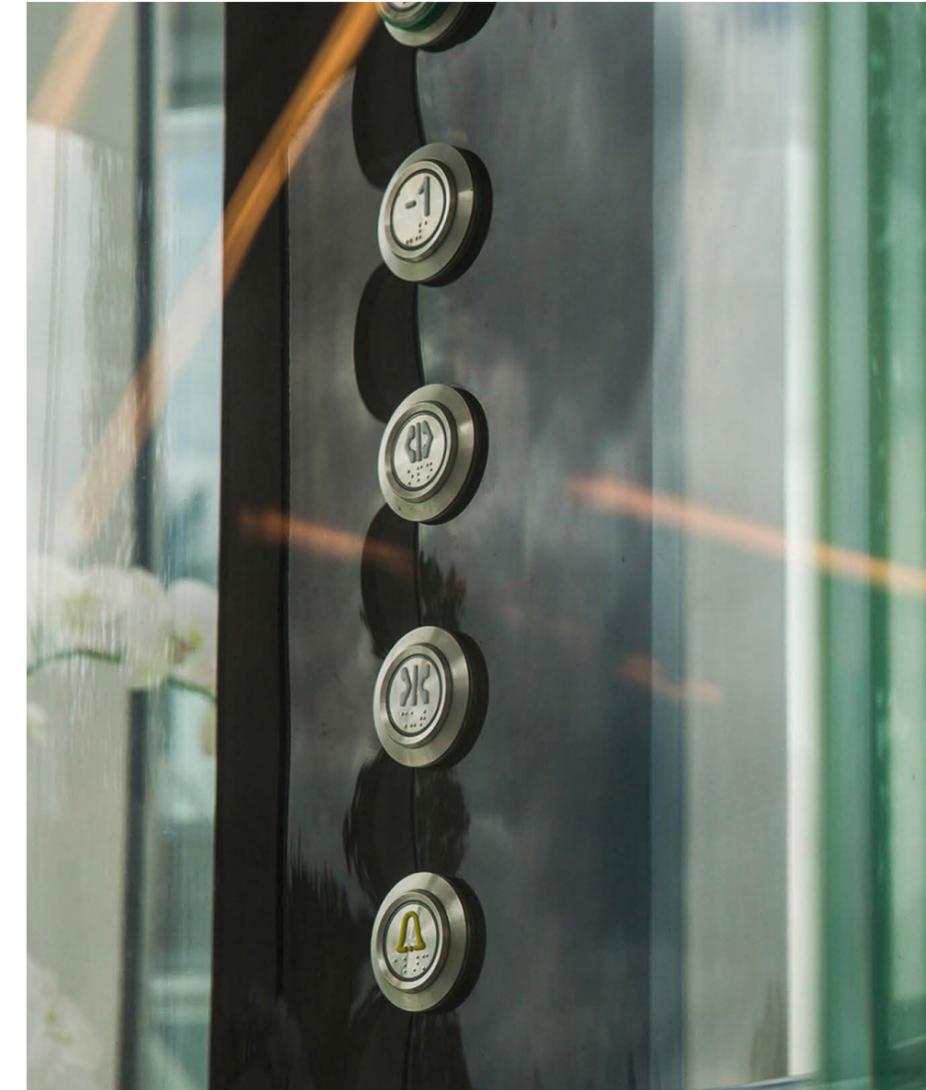

GLASS FINISHES

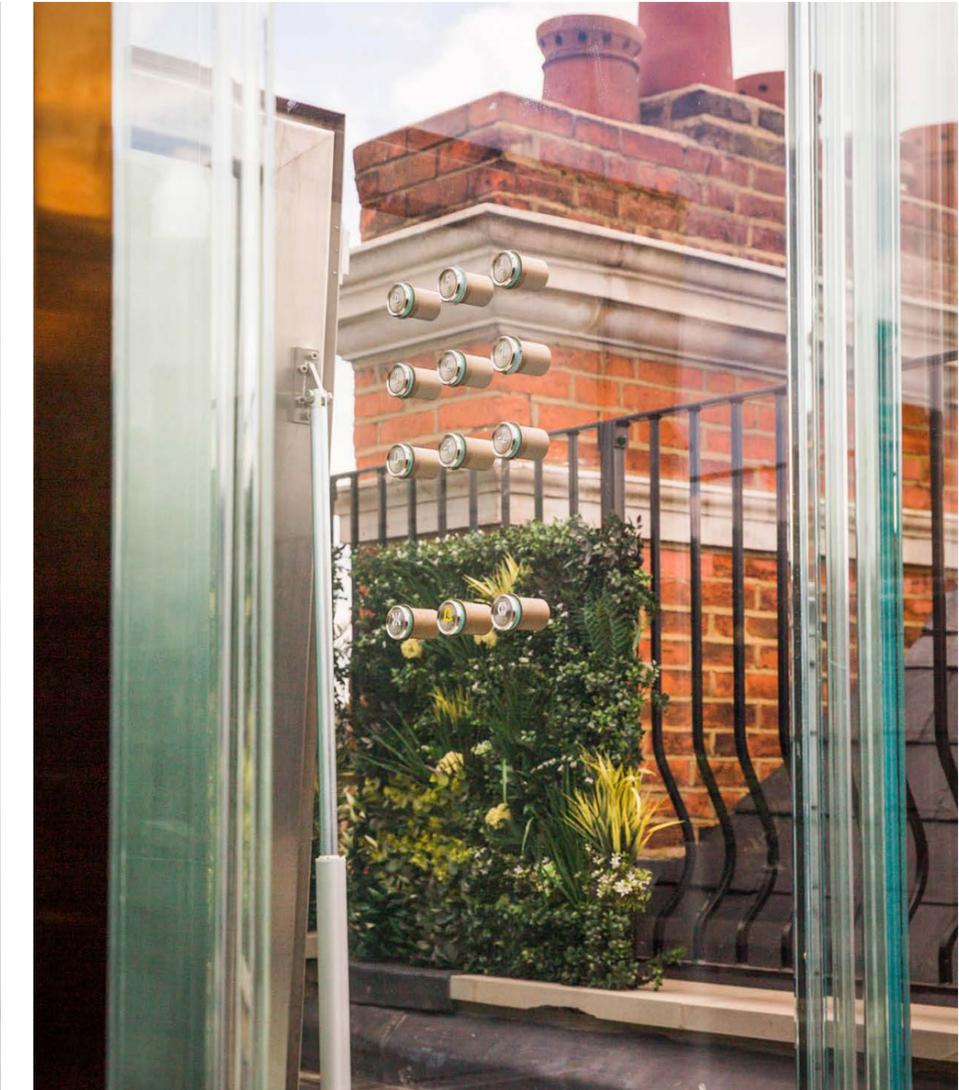

TINTED GLASS

It allows maximum light in while maintaining your chosen level of privacy or obscuration. This can be done on certain floors when privacy is key. Or provide a desired aesthetic to match the surrounding space.

PAINT / DIGITAL PRINT GLASS LAMINATION

In order to hide mechanicals/sling we often add a layer of laminate between the stratified glass. We can also take a high-resolution scan of any sample and print an extremely detailed image behind the glass to match a nearby texture.

EXTRA CLEAR LOW IRON GLASS

Our glass material by Pilkington Glass provides the absolute best in transparency and purity of colour.

SOPHIE MALLEBRANCHE - WOVEN METAL LAMINATED INTO GLASS

Sophie Mallebranche's exceptional woven metal materials exist in a combination of hundreds of designs, motifs and colors. Bespoke, customized and made to order, these unique textile-like materials can be laminated into any section of glass in our lift designs.

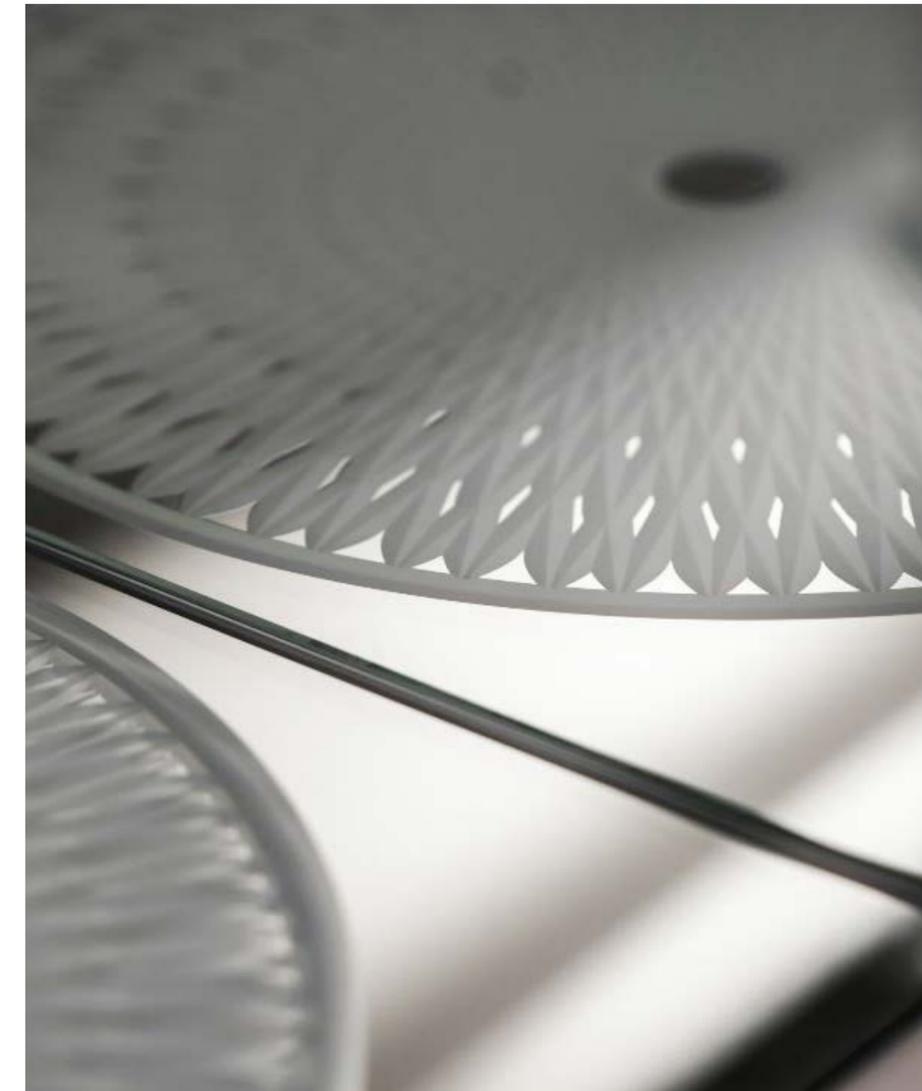

BANKER WIRE MESH PATTERNS (IN FRONT & BEHIND GLASS)

Available in thousands of different densities our wire mesh can also be powder coated, plated and galvanised to provide continuity with the surrounding space.

DECORATIVE SANDBLASTING

The process of sandblasting uses fine abrasive particles to produce an etched appearance on the surface of the glass. Each piece is made by hand, first creating and laying out the design on the glass and then carrying out the sand-blasting process.

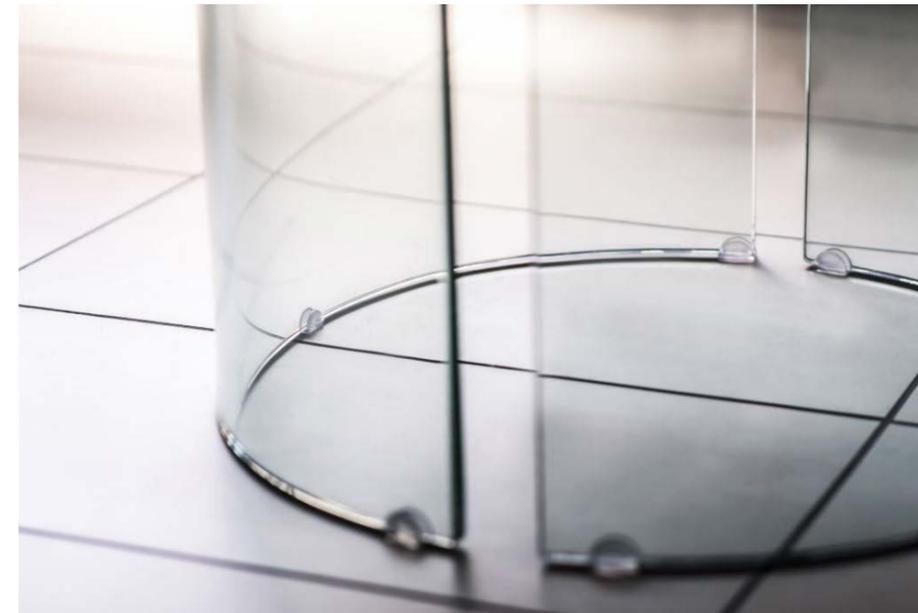

ENGRAVING

We can laser engrave any design/pattern onto our glass surfaces. We can combine these intricate patterns with light that disperses stunning highlights into the lift cabin and surrounding structure.

GLASS CRAFTED BY MILAN BASED VETRERIA PACI IN EXCLUSIVE PARTNERSHIP

Founded in 1966 the world renowned glass manufacturer is a key partner in bringing our creations to life, with an unrivalled mastery of the material no design is out of reach.

FREESKY TERRACE LIFTS

A Terrace Freesky Lift creates a seamless connection between the inside and outside world as it majestically ascends.

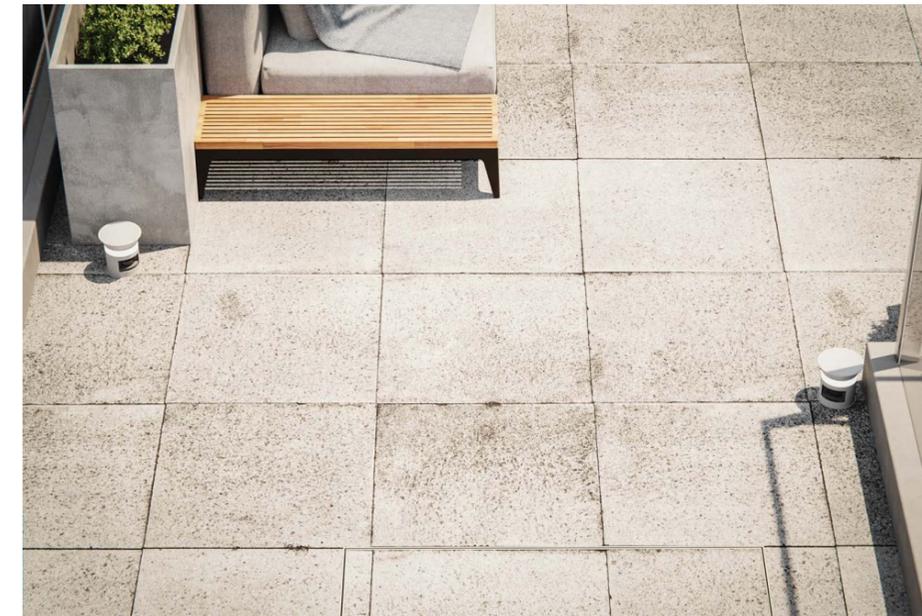

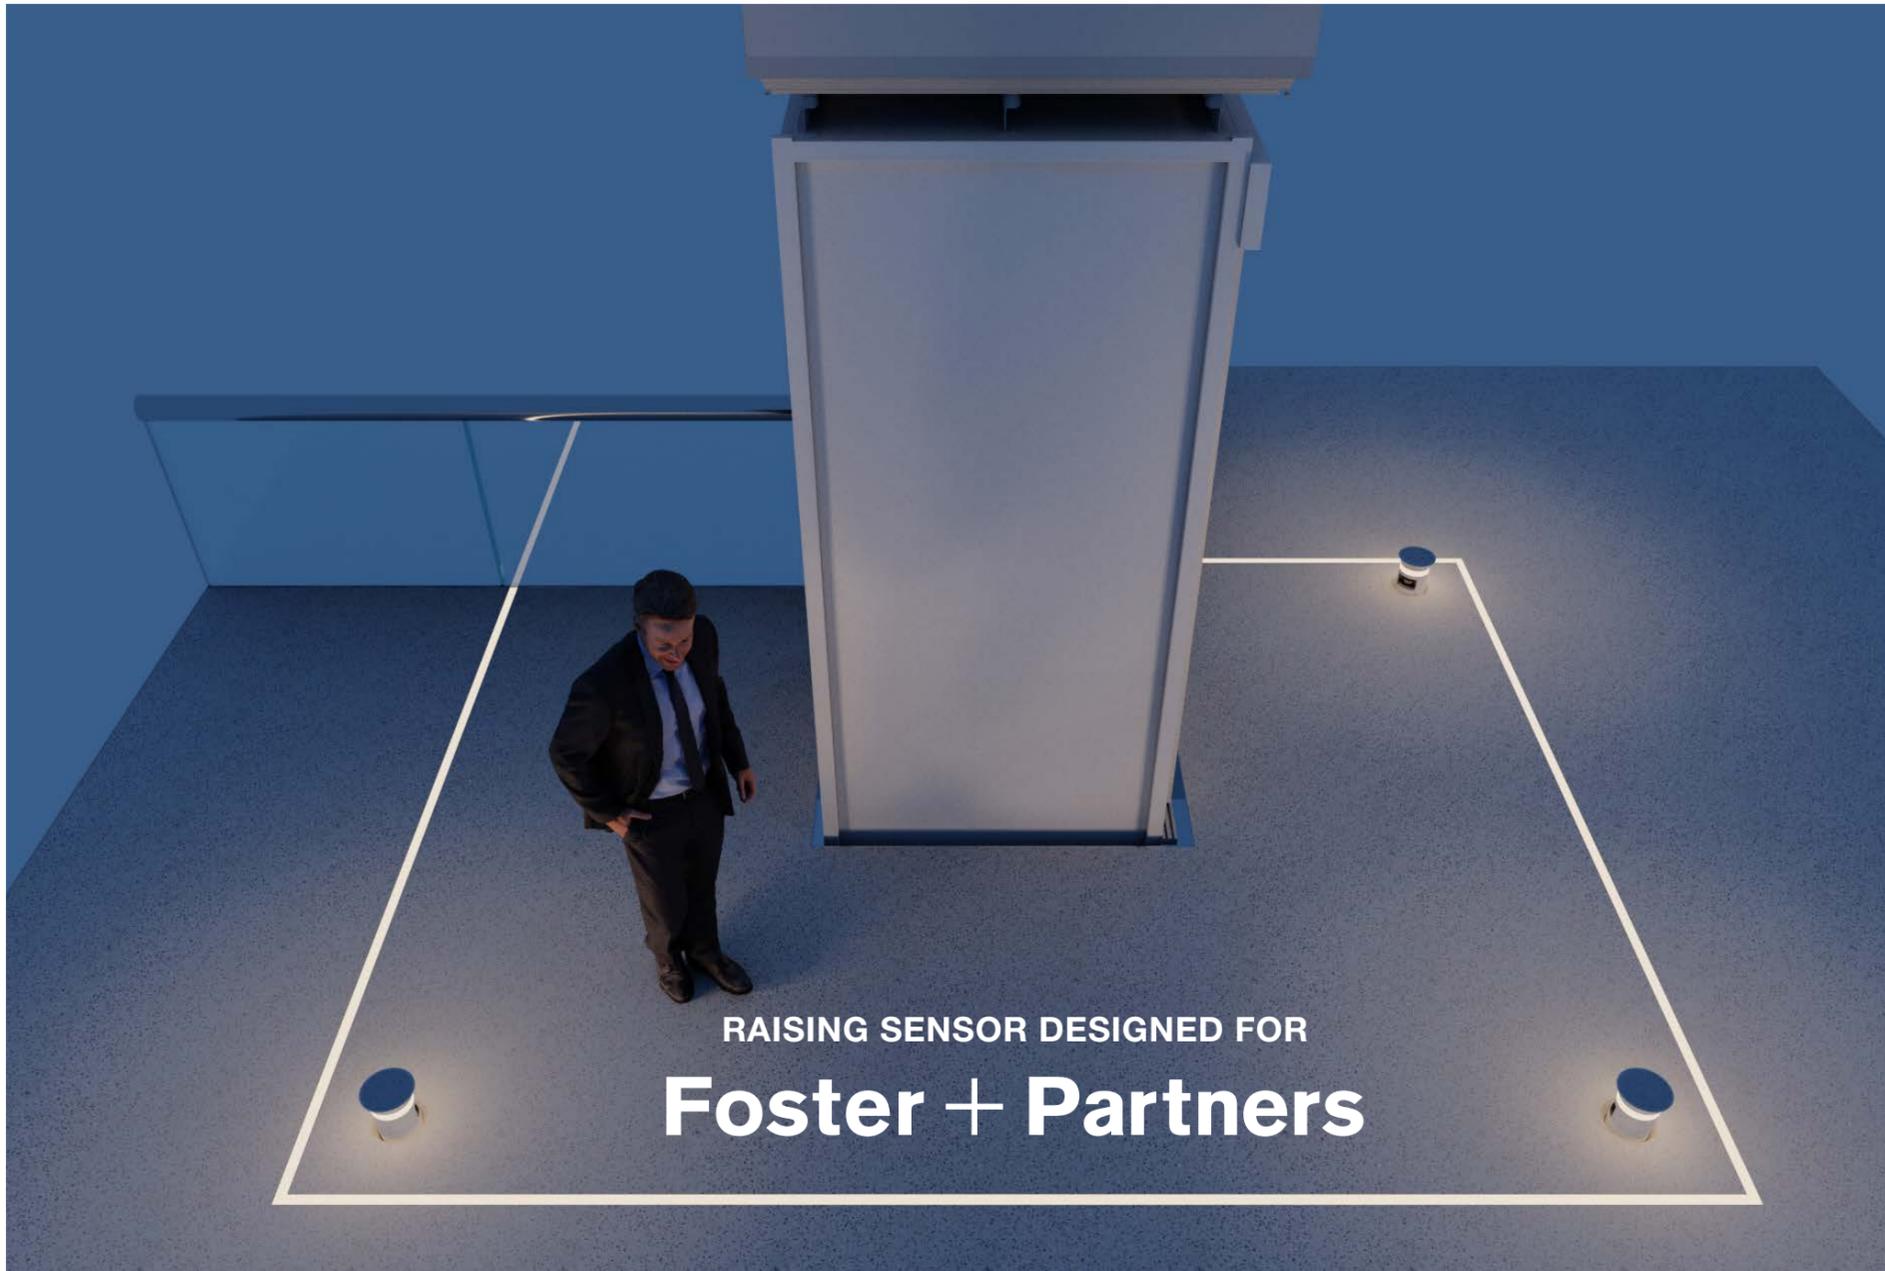

POWERED HATCH DESIGN

TRAPDOOR DESIGN

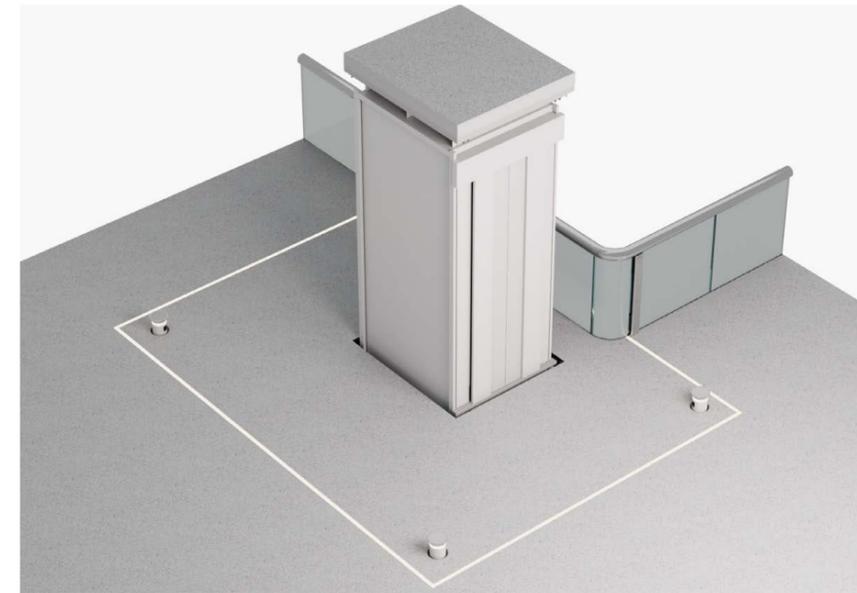

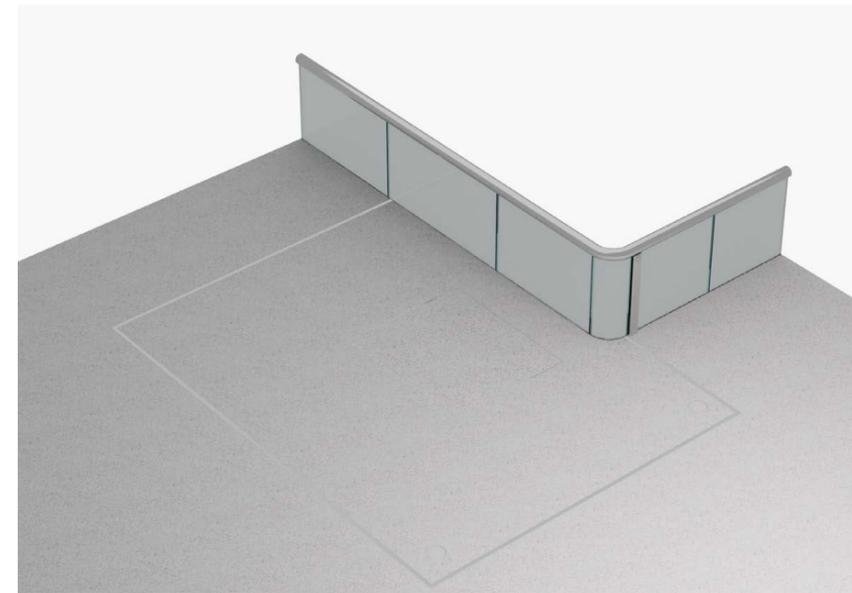

RAISING SENSOR DESIGNED FOR
Foster + Partners

EXAMPLE PROJECT SHOWING RAISING BOLLARD DESIGN FOR SENSORS

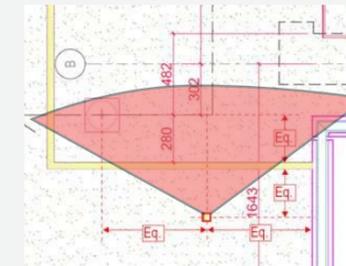

OPTIONAL PUSH BUTTON POST

POST DESIGN

The post includes a pinhole camera pointed towards the lift to feed the LCD screen inside the cabin during operation. Similar to the camera on 'RING' products with a wide field-of-view.

LCD screen to provide indication on the position of the lift

Two button controls as the user can send the lift to the bottom floor and lock it.

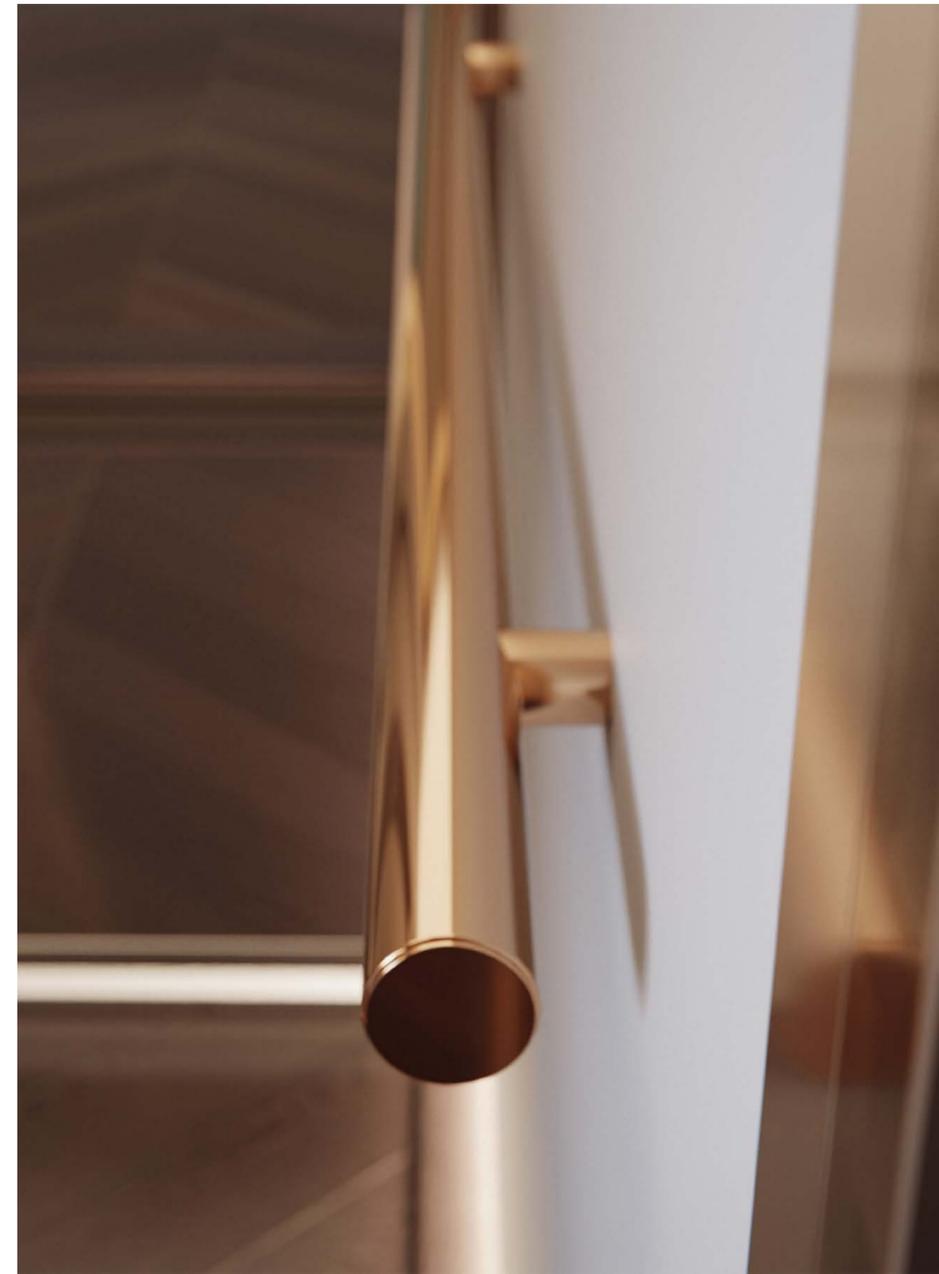

Fob reader underneath for security

LUXURY CABIN DESIGNS

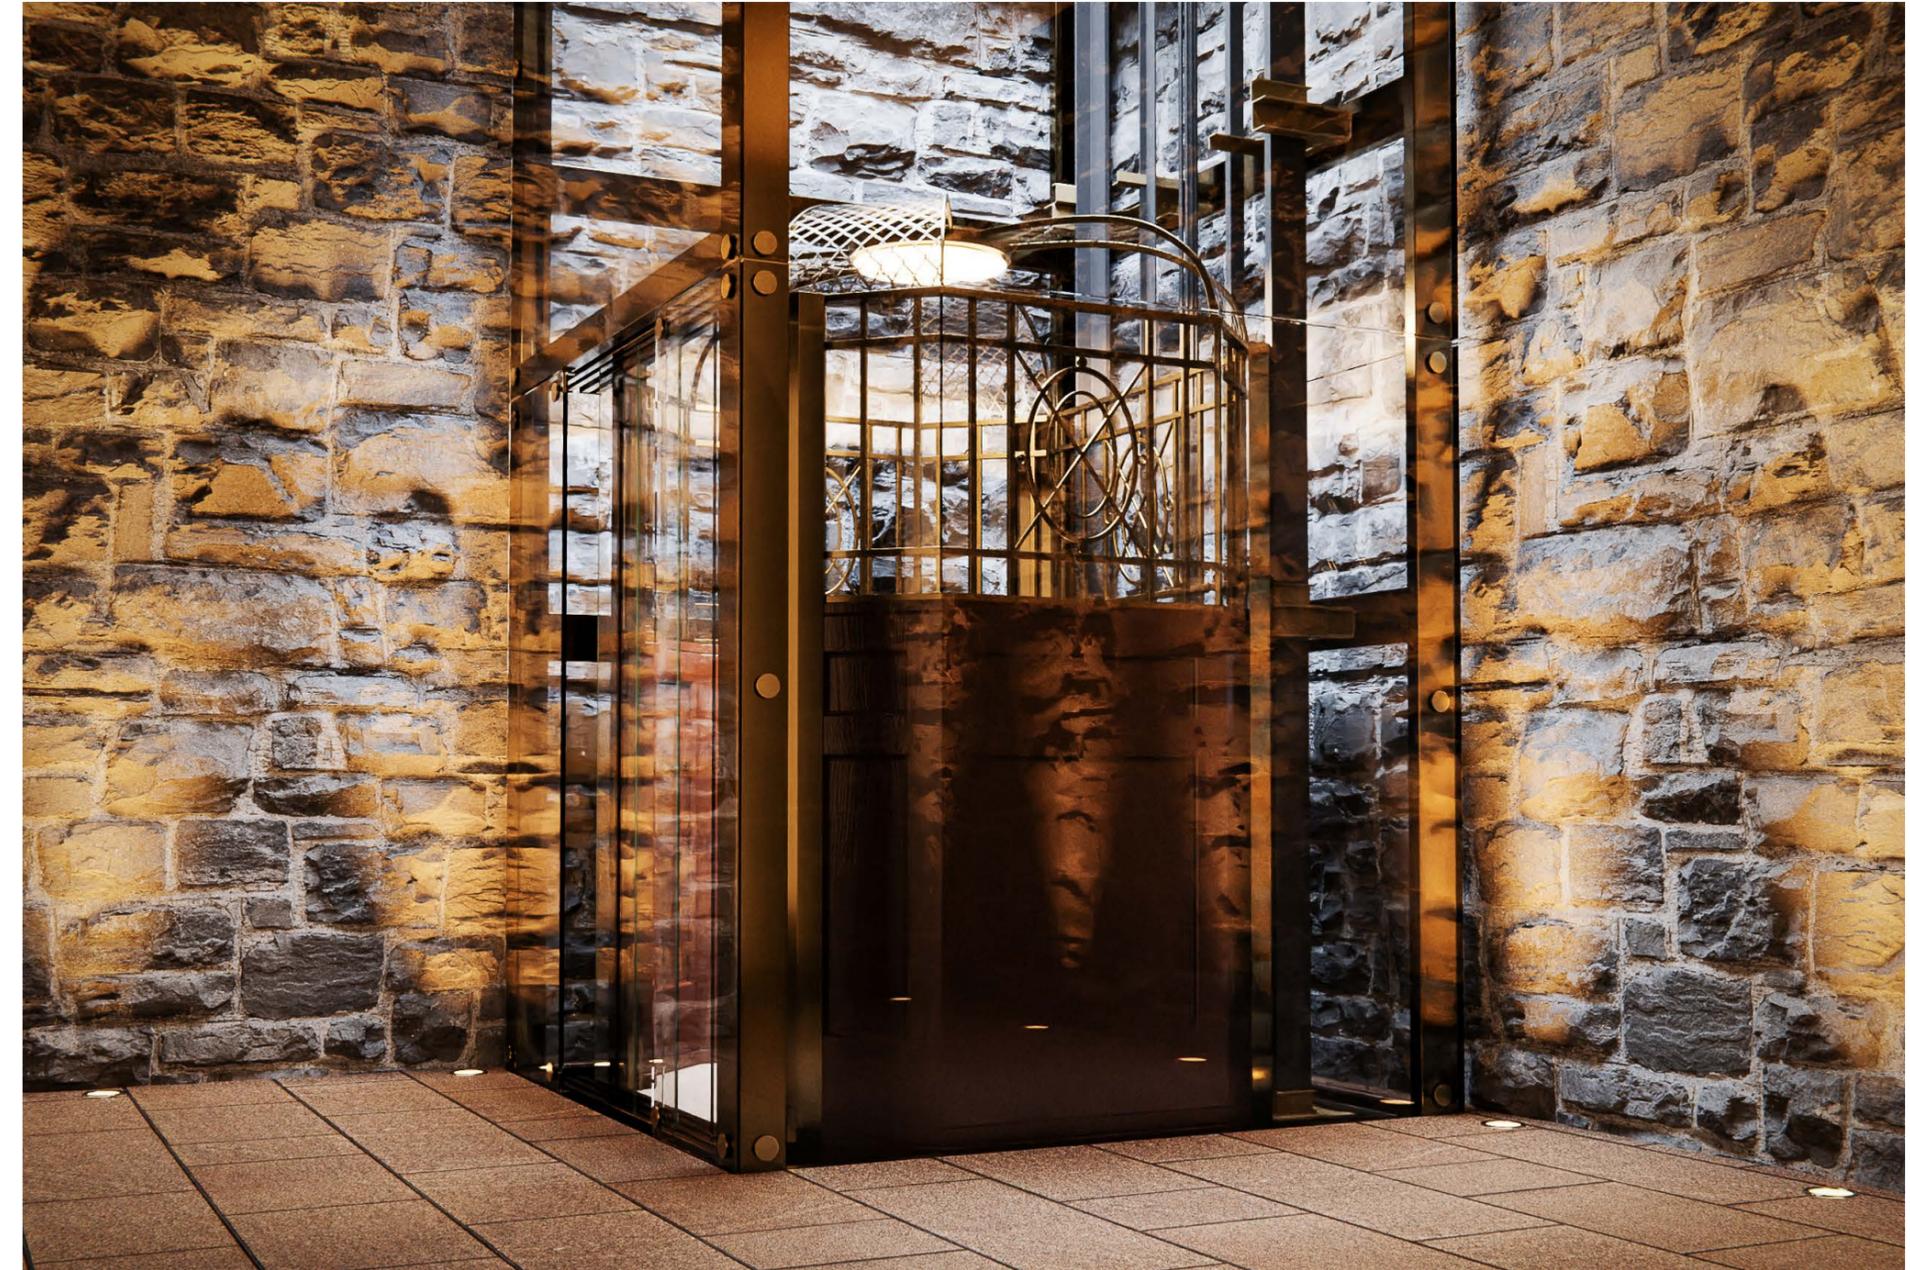

CLASSIC STYLING & RESTORATION

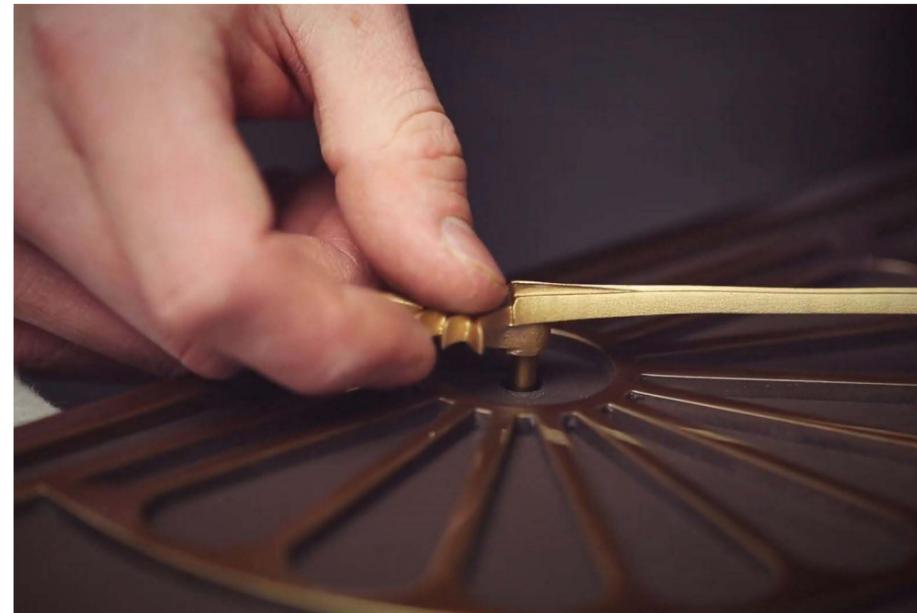

Exercising our knowledge and experience of modern lift design, we restore former decommissioned lifts without losing their original splendour and ensuring they meet the latest European standards.

CLASSIC DIALS &
PANELS INDIVIDUALLY
HAND-CRAFTED

VEHICLE LIFTS

Our vehicle lift is a combination of high-level engineering, an evolving creative vision and partnership with specialists from around the world.

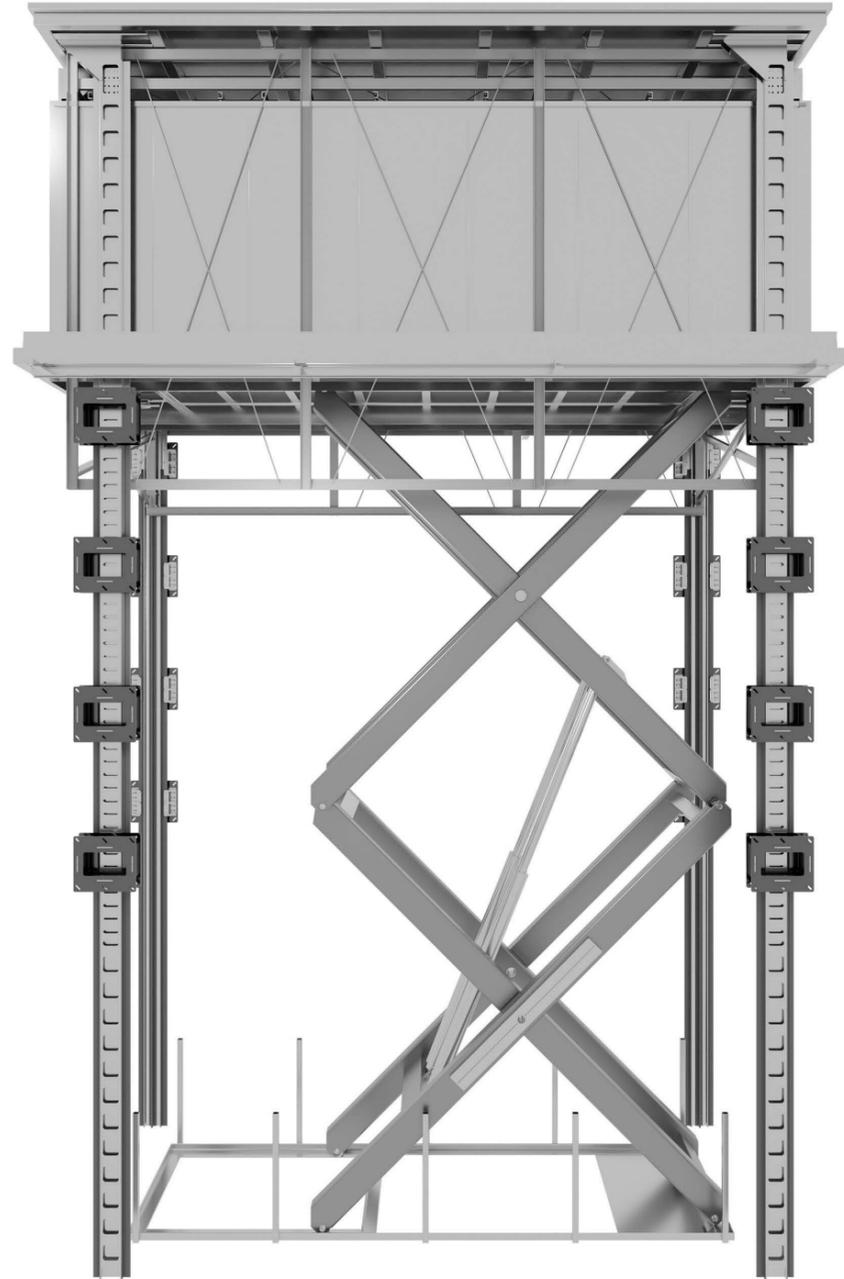

Designed to be invisible when not in use with the outside space. The dramatic reveal it offers has been refined by our talented team of designers and engineers, focusing on stability, precision and fluidity of motion.

BESPOKE VEHICLE CABIN INTERIORS

Premier Lift Group provide distinct design and exacting attention to detail to the interiors of our vehicle lifts.

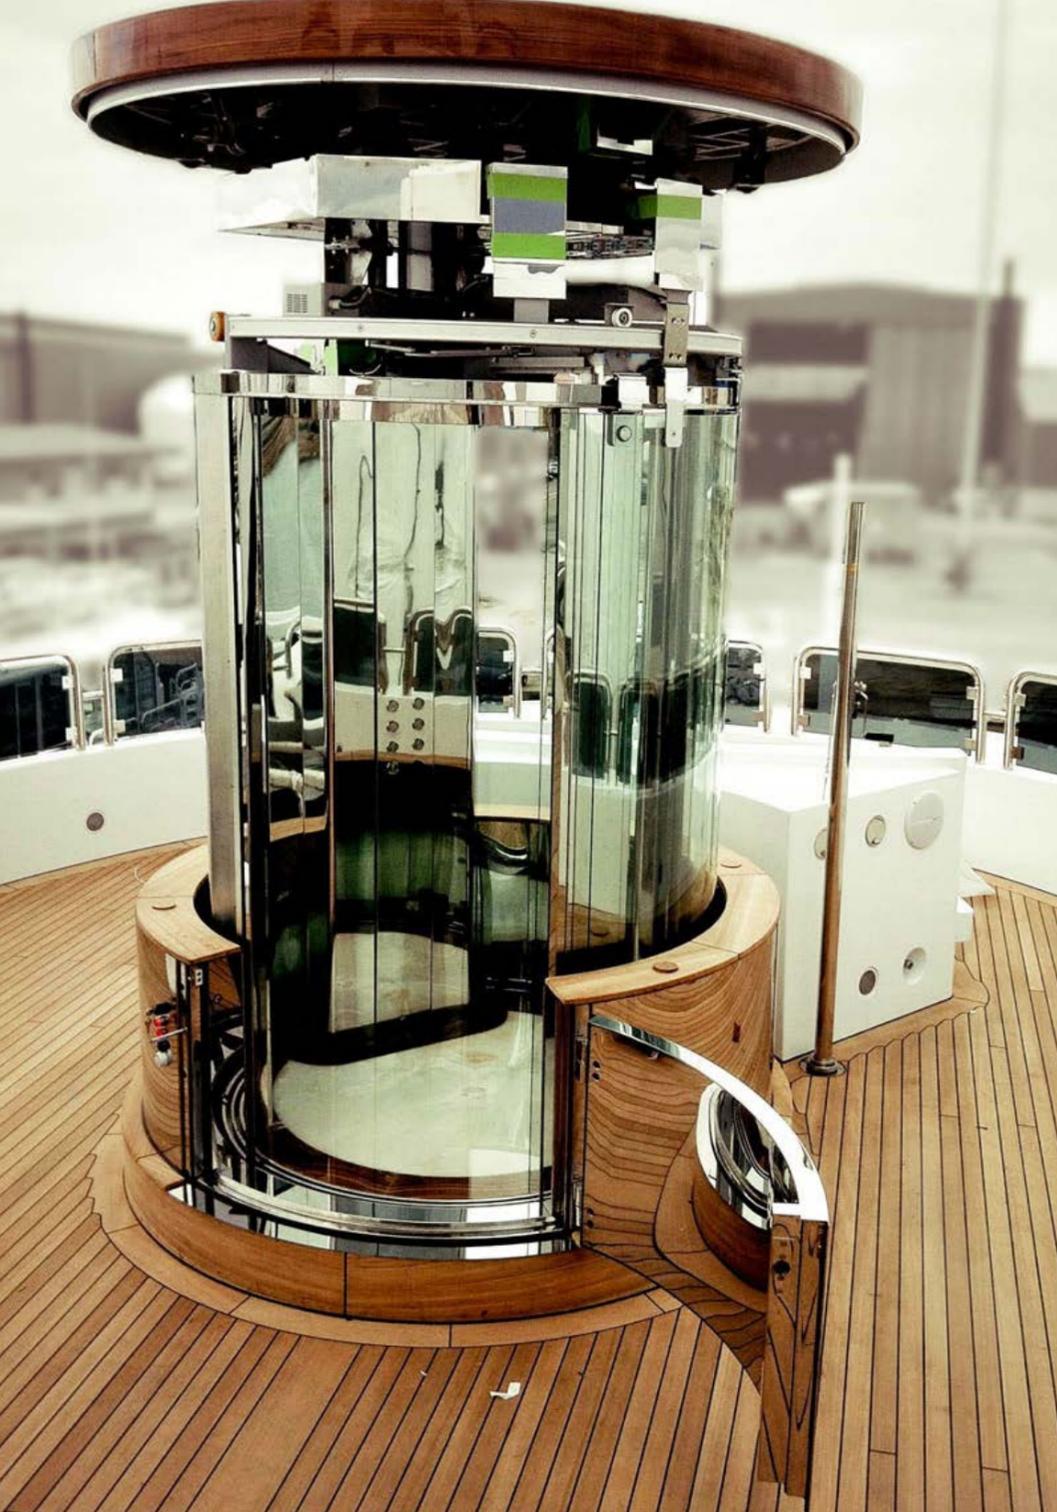

HYDRAULIC DRIVE SYSTEM

SERAPID RIGID CHAIN TECHNOLOGY

The SERAPID lifting solution does not require any machine room, and the full drive system is located in the elevator pit, underneath it. The elevation system has all the advantages of the highly accurate, reliable and low sound level SERAPID rigid chain. The installation requires very little servicing and avoids all high capacity hydraulic elevator issues.

YACHT & MARINE

Working in exclusive partnership with Milan-based, Millepiani Elevators, we have over 10 years of expertise delivering spectacular lifts on some of the world's most impressive modern yachts.
